### Advantages of the Smartphone Laptop front

- Immediate loading.
- Lightweight terminals.
- You do not need any extra communication system. It's a phone!
- In what circumstances the operator according to the gunwale.
- No need to reformat.
- They are also tempting for thieves. **(But they can hide much better).**
- A well-designed mobile application can do the same, and in much less time.
- Break but also times for free...
- In clear cases such as BlackBerry security total. Also for the case of Android, Symbian, Iphone and Windows Mobile, Good manufacturer offers the same security as Blackberry.

### Disadvantages of the Smartphone Laptop front

- Size screen and keyboard... But you know there are adapters for keyboards and screens, Bluetooth for Smartphone.

### Disadvantages for the Smartphone Laptop

- Long Time to load.
- It is heavy and uncomfortable.
- Need acoplar to connect 3G system from USB. **So another SIMM and other fees (€€€)**
- They are expensive for the work they do in mobility (€€€)
- You have to reformat every so often. They know well systems departments. (Also €€€ by time IT resources).
- It is tempting for thieves (€€€€).
- Usually the business the reporting system is the same as in the internal computers from the office. The performance differences are obvious. (€€€ saving time).
- It is broken and should be change . Again disbursement. (More €€€)
- The are certain security issues. (Can be €€€)
- Difficult IT department management. (€€€€ extra time IT resources).
